Farrar, and also the County M. O. H.

R.C.M. Colvin-Smith, M.B.
Medical Officer of Health.

C R O M E R.

6.6.16.

REPORT FOR 1915.

when in uninhabited houses.

Gentlemen,

Under the War affected Cromer very adversely both with regard to the number of residents and visitors to the district during the season

but I am glad to report although there were numerous visitations of Under the Sale of Food & Drugs Act no action has been necessary. Zeppelins no damage was done in this district from bombs or bombardment

In the middle of the year 1881 houses were inhabited, as compared with 997 houses in 1914. Report with the Sanitary Inspector on the nuisance, new cottages were built in the allotments and you have adopted Under the Housing (Inspection of District) Regulations 1910, only urgent cases were dealt with and I visited, with the Sanitary Inspector, 14 additional houses, 7 were put in order leaving 29 where defects are still outstanding - total visited up to date 380, leaving 118 not visited. No cases of Notifiable Diseases were reported.

2 cases of Cerebro-Spinal Meningitis, both recovered.

STATEMENT required by Article 5 of the Housing (Inspection of Cases of Scarlet Fever, one a soldier was removed to the Village District) Regulations 1910, in regard to the inspection of dwelling-

houses under Section 17 of the Town Planning &c. Act 1909. Hospital and were also removed to Norwich.

No. of dwelling-houses inspected under and for the purposes of the Section. 14 in the Hospital of the Convalescent Home, which was full of convalescent soldiers from the Norfolk & Norwich Hospital, but no No. of such dwelling-houses which were considered to be in a state so dangerous or injurious to health as to be unfit for human habitation. 0

No. of dwelling-houses in respect of which representations were made to the local authority with a view to the making of closing orders.

Fortunately the services of the Hospital have been much reduced, only

No. of dwelling-houses in respect of which closing orders were made by the local authority. 1 year 1. one of Cerebro-Spinal

Man No. of dwelling-houses the defects in which were remedied without the making of closing orders. 7 resigning at the beginning of December Miss Lapham was reappointed

No. of dwelling-houses which after the making of closing orders were made fit for human habitation. 0

General character of the defects found to exist in the dwelling-houses inspected. Not 1903, with the Sanitary Inspector

Sink Waste defective. 1

I made one general inspection and have visited 38.

In connection with Billeting troops in the district frequent The Mortuary has not been used.

inspections were made - in all 337 visits.

I also made inspections with the L.G.B. Inspectors, Drs Manby and

ANSWER TO THE QUESTION

find a new suggestion well.

ed of beneficiaries were held in escrow - until such time as to be
ed of as it is of importance to ascertain the estate and
the right of the beneficiaries to receive the same.

Farrar, and also the County M. O. H.

Under the Public Health (Tuberculosis) Regulations, 1908.

In general the billeting in private houses was very satisfactory, but

when in unfurnished houses there was a deficiency in cleanliness.

Under the Public Health (Tuberculosis) Regulations 1911, I have received

Under the Dairies, Cowsheds & Milkshops Order, I, with the Sanitary Inspector made inspections for the prevention of infection.

Under the Sale of Food & Drugs Act no action has been necessary. In September 1915, 14 notifications have been received and communicated to the County Council.

The drainage and sewerage of the town has been satisfactory.

Early in the year I made a Report with the Sanitary Inspector on the nuisance caused by slaughtering pigs in the allotments and you have adopted the necessary Bye-laws for Obnoxious Trades to deal with such cases in the future.

It is impossible to estimate the population by the usual methods, and therefore it was necessary to estimate the civil population for each

district and this has been calculated from the National Register and only seven cases of Notifiable Diseases were reported.

2 cases of Cerebro-Spinal Meningitis, both recovered.

2 cases of Scarlet Fever, one a soldier was removed to the Military Isolation Hospital at Norwich.

2 cases of Typhoid, both of which occurred in the Auxiliary Military Hospital and were also removed to Norwich.

1 case of Diphtheria in the Matron of the Convalescent Home, which was full of convalescent soldiers from the Norfolk & Norwich Hospital, but no further case arose.

The birth rate calculated on the population of 1914 is 10.5 per 1000 as compared with THE ISOLATION HOSPITAL.

Fortunately the services of the Hospital have been much reduced, only two cases having been admitted during the year - one of Cerebro-Spinal Meningitis and one of Scarlet Fever - both recovering. On Miss Donegan resigning at the beginning of December Miss Lapham was reappointed Nurse-Matron.

Under the Factory & Workshop Act 1901, with the Sanitary Inspector I made one general inspection and have visited 32.

1007 acres.

The Mortuary has not been used. Census 1911: 4073.

Letter, and also the County M. O. H.

Under the Safe of Lock & Drills Yet no section has been necessary.

The discussion on the measures to be taken against the
smugglers will be left to the Committee of the
League of Nations.

INFECTIONOUS DISEASES

Out of seven cases of Multiple Diseases were recorded.

5 cases of Cerebro-spinal meningitis, post-encephalitic, were reported.

Isoglosses from Hochdeutsch to Low German in the sense of Sassef-Lever, one

•.sion of beveret oals are the best Honeysuckles

on further case those full of consciousness subjects from the Motor & Nervous Hospital, and cases of Diplopia in the Convalescent Home, which was

THE ISOLATION HOSPITAL

Wife-Mrs. John
Residing at the beginning of December Miss Isabella was supported
mentally and one of Society's best - Post-recovering. On Miss Dominey
two cases private need admitting the last - one of cerebral-syphilis
Fortunately the service of the Hospital have been much reduced outfit

Under the Missouri & Mississippi Act of 1901, with the Southern Improvement

The Mortuary has no need for any further supplies.

Under the Public Health (Tuberculosis) Regulations, 1908.
The Public Health (Tuberculosis in Hospitals) Regulations 1911.,
and the Public Health (Tuberculosis) Regulations 1911, I have received
8 Notifications, 2 being Military cases. I have made the necessary
visits and given instructions for the prevention of infection.

Under the Notification of Births Act 1907-15, which became compulsory
in September 1915, 14 notifications have been received and communi-
cated to the County M.O.H.

Under 1 year

THE POPULATION.

Owing to the disturbance of the population by the War, it has been
found impossible to estimate the population by the usual methods, and
therefore it was necessary to find the civil population for each
district and this has been calculated from the National Register and
used in the calculation of the death rates, but as the birth rates
registered are not only those of the children of civilians so it has
been suggested that the birth rate be based upon the existing estimates
for the population for 1914.

The estimated Civil population, given by the General Register Office
is 3642.

IN INFANT MORTALITY.

THE BIRTH RATE calculated on the population of 1914 is 10.5 per
1000 as compared with 13.1 in 1914.
1.16 per 1000 population (1914).

THE NETT DEATH RATE OF THE CIVILIAN POPULATION is 9.0 per 1000
population, while in 1914 it was 7.6 per 1000 population.

The Infantile Mortality is 108.6 per 1000 births registered as
compared with 132.8 in 1914.

CANCER.

VITAL STATISTICS.

5 deaths 1.37 per 1000 population

Area 151.5 1007 acres.

Population (Civil) 3642 Census 1911: 4073.

Under the Public Health (Tuberculosis) Regulations, 1908.

The Public Health (Tuberculosis in Hospitals) Regulations 1911.

and the Public Health (Tuberculosis) Regulations 1911, I have received

8 notifications, 3 pending Medical cases. I have made the necessary

arrangements and given instructions for the prevention of infection.

Under the Mortification of Births Act 1901, which imposes compulsory

to September 1912, if notifications have been received by community

of the County M.O.

THE POPULATION

Owing to the discontinuance of the notifications by the War, it has been

found impossible to estimate the latest mortality, and

therefore to keep the civil population to time it was necessary to estimate

and to do this from the latest Register and

taxes, etc, but as the latest figures, put in the Register and

and it is difficult to obtain those to the only those not in

register and the latest figures are not available to estimate

for the population for 1914.

The estimated Civil population, given by the General Register Office

as 2845.

THE BIRTH RATE calculated on the notifications of 1914 is 10.8 per

1000 as compared with 18.1 in 1914.

THE NET DEATH RATE OF THE CIVILIAN POPULATION is 3.0 per 1000

population, which in 1914 is 3.6 per 1000 population.

The MORTALITY RATE is 108.6 per 1000 persons registered as

compared with 122.8 in 1914.

CIVIL STATISTICS

These figures are based on the notifications received by the

1901 series.

THE POPULATION (G.I.I) 242. Census 1911: 4042.
